DA Documents to be approved

- Circulated on Friday. Comments received included. We need to send them out to ECC and STAC.

- AdV Management Plan for Computing

    VIR-0185B-14

- Answer to ECC recommendations (May 2013)

    VIR-0196B-14

STAC report: VIR-0197A-14

- We have proposed to the STAC a report based on the presentation of the Search Plans, a very important activity ongoing in DAC in the last months. The most mature have been presented to the collaboration in Nice.

- Besides this: Past accomplishments, Manpower tables, Answer to the (many and important) questions they have posed in May.

- The document is in good shape but not ready, at VIR-0197A-14

You can start looking at it. We will circulate it and ask for approval after Easter, to send it to the STAC in early May.

A related point: we need to upload the Implementation Plan draft to LSC DCC. It is presently very important to share information with LSC as they are also preparing the CM and computing requests to the NSF. Do you see any problem ?
